

DEEP INDUSTRIES

Exhibit 1: Moving up the Value Chain

Deep Industries Ltd. has specialized in providing various Oil & Gas support services since more than 30 years. The Services portfolio includes Natural Gas Compression , Natural Gas Dehydration, Workover and Drilling Rigs Services, and Integrated Project Management Services.

Deep has also pioneered the charter hiring of Natural Gas Dehydration and is the only Indian company providing Integrated Project Management Services Recently, as a part of 'Value Added Offerings' Deep has forayed into EPC of entire Gas Processing Facilities on charter hire basis and has become the first entity in the country to provide such one of it's kind services.

...Deep Inds covers 70% of post exploration value chain...

Services

With its diversified oil & gas services portfolio, Deep Industries Limited now covers more than 70% of Post Exploration Services in the entire value chain of Oil & Gas Services Industry.

BUSINESS MODEL

Drilling Rigs: Pay for each day the rig is in use.

Gas Compression: Pay based on the amount of gas processed, with a minimum volume requirement.

Huge Tailwinds and Revolving order book

Aastha:

OK. So OK, fair enough. I appreciate your point. So essentially what I'm trying to understand is that your order book with the tailwinds that we have, you know, spoken about extensively, your order book does not seem to be growing at the same speed at which the industry should be growing according to the macro commentary. Or is that an unfair statement?

Rohan Shah:

So I would not agree to that to the extent because see in our case order book is always revolving and it's a continuous supply of services for us. So, the amount we add into order book equally it would be reduced by execution of those part of contracts. And so, it would always be like adding to an order book with new contract and then realizing revenue out of existing running. So yes, to the extent I would say that in our business, some of orders are having some good amount and some are in regular nature. So probably differentiation between new orders and execution would be little less appearing in recent one or two quarter. But it can anytime bump up with big orders.

...provided by Dolphin Vikrant (now 'Prabha')

Dolphin Vikrant (Now 'Prabha') is a Dynamically positioned (DP2) Accommodation Barge with total capacity of 275 men and material handling capabilities. The barge is in final refurbishment stage.

The Dolphin Vikrant (now 'Prabha') is a DP2 dynamically positioned barge owned by a subsidiary of Dolphin Offshore Enterprises (India) Limited. Its advanced Dynamic Positioning System uses active thrusters to maintain precise positioning by counteracting environmental forces, making it one of the few such high-earning barges in the world.

Asset Status

- **Prabha** has reached Mexico after completing dry docking and is in its final refurbishment stage
- The revenue stream is likely to start in H1 FY25

Revenue Potential & Earnings Profile

- DP2 barge like Prabha are in heavy demand due to its features and capabilities.
- It has potential to generate excellent daily rental revenues of with EBITDA Margins in range of ~ 60%
- Contract tenors ranges from 1 to 5 years.

Dolphin Offshore: Capex done is usually depending on the awarded contract. Dolphin Offshore was acquired at an attractive price of Rs 270mn and has a revenue potential of Rs 1bn in the near term. Company is doing an additional capex of Rs 450mn in the Dolphin Offshore business for refurbishment. With the acquisition of Dolphin Offshore, the company will be catering to both the Onshore and the Offshore projects. Operating in the offshore segment is more challenging as it escalates the overall supervision cost vs the supervision cost on the Onshore projects side.

Guidance by the company

The company is targeting ROCEs and ROEs to reach at 14-15% in the coming years. Deep is focusing on adding more value added services like entire gas processing on charter hire basis. The management believes to use debt optimally and stay quite conservative to debt to optimize their free cash flows.

JINDAL DRILLING

Jindal Drilling & Industries, part of the Dharam Pal Jindal Group, is a leading Indian company in offshore drilling and allied services, including directional drilling and mud logging.

The services offered by the company are :

Offshore Drilling: It is a mechanical process where a borehole is drilled on the seabed to extract crude oil and natural oil beneath the seabed.

Directional / Horizontal Drilling: It is a technique of drilling a wellbore at multiple angles, it has become more accurate, precise, and efficient.

Measurement While Drilling Services: To get the real-time measurement of trajectory information such as direction, tool face, inclination, and temperature, an MWD system is installed in the drill string. It consists of three sections: Power supply, Sensor section, and Transmitter.

Mud Logging Services: To detect the presence of oil and gas, drilling engineers study the sample of ground or rock pieces taken from the borehole by drilling. The process is known as Mud Logging services.

Moreover, the company has managed to establish longstanding relationship with India's leading oil exploration company (ONGC). JDIL has been able to achieve contracts/renewals in the past on consistent basis. The company's years of operational experience and expertise on the back of its strong management team has enabled the, to achieve nearly 100% efficiency standard across its rigs.

Very simple business model

About us

- Leading offshore drilling services contractor in India's oil & gas sector
- Over 35 years of offshore drilling experience
- Efficient and experienced operational & management team
- Delivering high level of customer satisfaction
- Excellence through stringent safety measures
- Operates 5 offshore jack-up rigs with ONGC in India of which 2 are owned
- JV company deployed 1 offshore jack-up rig Jindal Pioneer with Saimexicana in Mexico
- Purchase of rig Jindal Pioneer in final stage awaiting approval from statutory authorities
- Provides mud logging & directional drilling services to oil & gas sector

Rigs – Order book (approx.) as on 30/06/2024

Rig name	Contract Duration	Operating Day Rate (USD)	Order book (approx.)	
			USD mn	Rs. crore
Discovery-I	May 23 - May 26	48,324	31	264
Jindal Supreme (upcoming contract)	November 24 – November 27	88,859	92	776
Virtue-I	October 23 - October 26	80,633	65	550
Jindal Star	July 23 - July 26	44,000	32	267
Jindal Explorer	May 22 - May 25	38,790	12	99
Total			232	1956

- Above figures are approximate calculations of ONGC contracts received and may vary based on actual operational performance.

Easy to do math

Key Triggers -

- Nagraj:** Got it. And does the spot rig rates continue to hover around the 100,000 levels, which would be relevant for our rigs, which are coming up for renewals in 2024, 2025 and 2026? And does that still remain the case?
- Raghav Jindal:** Yes, so if you see the last few contracts, ONGC has not been able to get all of its rigs that it wanted. So it was still short, it had a shortfall of four rigs. The prices in the last contract were touching about \$100,000. So we do expect the rig rates to further increase with the coming contracts. So hopefully, the next few contracts that our company will get also would be at a higher rate.

Sharp increase in rig charter rates:

Healthy revenue visibility:

Improvement in operating performance on account of acquisition of Rig and higher charter rates:

Concerns:

Susceptible to volatility in crude oil prices:

Client concentration risk in the rigs business.

Comprehensive Solutions Across the Spectrum

Seismic Services

ONSHORE SEISMIC SERVICES WITH EXTENSIVE INDUSTRY EXPERIENCE OF OVER 31 YEARS

Operations & Maintenance

EXTENSIVE EXPERIENCE AND EXPERTISE IN TURNKEY OPERATION & MAINTENANCE OF ONSHORE AND OFFSHORE OIL AND GAS FACILITIES

Production Facility Construction

SIGNIFICANT EXPERTISE AND FINANCIAL CAPABILITY TO CREATE LOW COST, HIGH QUALITY ONSHORE AND OFFSHORE PRODUCTION FACILITIES

Production Enhancement

EXTENSION OF O&M OFFERING TO OIL & GAS PRODUCTION INCLUDING RESOURCE OWNERSHIP

Leading Seismic Prowess

Over the past decades, AESL has solidified its position as a leader in the seismic exploration sector.

Our dedication to quality and innovation has enabled us to pioneer seismic technologies and expand our operational footprint across multiple countries.

REDEFINING SEISMIC EXCELLENCE

Pioneers in Technology

THE FIRST INDIAN ENTITY TO LEVERAGE WIRELESS SEISMIC TECHNOLOGY

Diverse Footprint

MARKING OUR PRESENCE ACROSS INDIA, INDONESIA, MYANMAR AND IRAQ - RUNNING MULTIPLE OPERATIONS SIMULTANEOUSLY

State-of-the-Art Affiliations

COLLABORATION WITH INDUSTRY GIANTS LIKE WIRELESS SEISMIC, INOVA, SERCEL, AND MORE FOR CUTTING-EDGE SOLUTIONS

Testament to Consistency

SUCCESSFULLY EXECUTED SEISMIC CONTRACTS OVER 500CR SINCE 2016 AND COUNTING

Unyielding Spirit

NAVIGATING THE TOUGHEST TERRAINS AND ALWAYS DELIVERING ON TIME

Leading with Innovation

EMBRACING AN ARREY OF MODERN TECHNOLOGIES IN THE FIELD TO MEET MODERN CHALLENGES

Business Outlook – Oil and Gas Production

AESL is gearing up for a transformative phase in oil and gas production, with a blend of domestic ramp-ups and international ventures.

DOMESTIC PRODUCTION BOOST

- **INDRORA FIELD:** Production ramp-up anticipated in the coming months.
- **CAMBAY & MEWAD FIELDS:** Set to commence production next year.
- **COLLABORATIONS ON THE HORIZON:** Advanced discussions with private players to participate in their producing assets.
- **OPPORTUNITIES WITH ONGC & OIL INDIA:** Participating in Production Enhancement Contracts (PEC) to further acquire producing acreage with significant upside potential.

INTERNATIONAL PROSPECTS

- Evaluating opportunities to acquire O&M projects along with Production Enhancement Contracts in producing fields.

STRATEGIC PARTNERSHIP EVALUATION

- Exploring and evaluating latest production technology tie-ups with global players to increase existing production.

Key Highlights – Q1FY25

- Revenue in Q1FY25 was impacted by expected seasonality and the postponement of one of our offshore projects due to a delay in vessel delivery. The deferred revenue of ~Rs 35 crores is expected to be realized in coming quarters
- The operating profit for the quarter showed a significant improvement compared to the same period last year, on account of better operating efficiency
- We are participating in tenders worth Rs 1,000 crores for seismic projects and are optimistic about securing contracts, worth ~Rs 200-300 crores, which we anticipate will materialize in the second half of FY25
- The total order book as of now is ~Rs 1,022 crores, 61% attributable to Infra or CHP, 34% to Operations & Maintenance, 5% to Seismic
- FY25 revenue is expected to be in range of Rs 450-500 crores

MANAGEMENT COMMENTARY

Mr Kapil Garg, MD

“During the quarter that went by, we saw a revenue growth of ~31% y-o-y. However, a sequential decline in revenue occurred due to seasonality and delayed arrival of vessel of offshore project. We anticipate this project to be commissioned in coming quarters.

The operating profit for Q1FY25 showed a significant improvement y-o-y on account of better operational efficiency.

We are invigorated by the vast landscape of opportunities before us. New prospects are emerging from tenders issued by Coal India and its subsidiaries for seismic surveys and coal handling plants (CHPs). This is inline with the Coal Ministry’s target of opening 100 new mines with coal production capacity of 500 MTPA by FY30. The mines with more than 2 MTPA production are mandated to implement mechanized coal handling facilities within the next five years. These initiatives align with the Government of India’s broader strategy to enhance energy self-sufficiency and reduce reliance on coal imports.

For Seismic business, we are participating in tenders worth Rs 1,000 crores and are optimistic about securing contracts, worth ~Rs 200-300 crores.

Our O&M business is fueled by these opportunities, supported by the government's focus on self-reliance in minerals and coal

Given these emerging opportunities, we remain highly optimistic about our long-term prospects and are confident in our continued growth.”

Midstream Companies

Pipelines: refined products and LPG pipeline network

Shares in Crude Products Pipeline Network under Operation by Length (out of 23,367 kms, as of May 1, 2024)

Shares in Natural Gas Pipeline Network Under Operation By Length (out of 27,516 kms as of December 31, 2023)

- With 12,581 kms of refined products pipeline in India, the Indian Oil Corporation Limited (IOCL) leads the segment with 53.84%, as of May 1, 2024.
- The top three companies, IOCL, HPCL and BPCL contribute to more than 80% of the total length of product pipeline network in the country.
- As of December 31, 2023, Gas Authority of India Ltd. (GAIL) had the largest share (62.14% or 17,099 kms) of the country's natural gas pipeline network (27,516 kms).

GAIL

1. Natural Gas Transmission and Marketing:

- **Transmission:** Operates a vast pipeline network for transporting natural gas.
- **Marketing:** Sells natural gas and LNG to various sectors.

2. Petrochemicals:

- **Production:** Makes polymers and chemicals from natural gas.
- **Sales:** Markets these products domestically and internationally.

3. Liquid Hydrocarbons:

- **Production:** Processes natural gas into LPG and other products.
- **Distribution:** Sells these products for industrial and household use.

4. Exploration and Production (E&P):

- **Upstream Activities:** Holds stakes in oil and gas exploration and production ventures.

Key Variables to Track:

1. Natural Gas Prices
2. Pipeline Utilization
3. Volume of Gas Transported
4. Petrochemical Production and Sales
5. Regulatory Changes

Opportunities:

1. Expanding Pipeline Network
2. Rising Natural Gas Demand
3. Petrochemical Market

Risks:

1. Price Volatility
2. Regulatory Changes
3. Execution Risks in Renewables
4. Increasing Competition

AEGIS LOGISTICS

An integrated oil, gas and chemical logistics company

Aegis Logistics Ltd (AGIS), founded in 1956, is an integrated oil, gas and chemical logistics company and one of India's top importers and handlers of LPG among private players. The company operates through its state-of-the-art necklace of liquid & gas terminals across major ports of India having a storage capacity of 15,70,000 KL for Chemicals & Petroleum, Oil and Lubricants (POL) and 1,14,000 MT of static capacity for LPG.

The company has gas and liquid terminals at six ports and is adding a liquid terminal at JNPT port, with a capacity of 110,000 KL, which is expected to be completed by early FY25. The company has also commissioned a 79,000 KL liquid terminal capacity in FY24 at Mangalore Port and expects to commission another 71,000 KL capacity in FY25. In FY24, AGIS also acquired a 16,000 KL liquid storage terminal at Kochi. Post the expansion, the liquid storage capacity is anticipated to increase to ~2 million KL. The company is setting up two major cryogenic LPG projects at Pipavav and Mangalore of 45,000 MT and 85,000 MT respectively.

AGIS has a strong network of autogas dispensing retail outlets along with a wide network of distributors who sell LPG cylinders and appliances to domestic, commercial, and industrial customers. It also provides LPG installation and interfuel services that maximise the efficiency and cost benefits of LPG to large industries looking to transition from other fuels to LPG.

Revenue Streams:

Terminal storage fees.

Logistics and distribution services.

Gas sourcing and sales.

Financial Metrics:

Revenue Growth and EBITDA.

CFO and ROCE

Operational Metrics:

Storage Capacity Utilization.

Logistics Volume (tons handled).

Terminal Throughput.

Expansion and Capex:

Progress on new terminal construction and capacity additions.

Joint venture performance (e.g., Aegis-Vopak partnership).

Opportunities

- Rising Energy Demand: Growing LPG consumption in India, especially in rural and urban households.
- Infrastructure Expansion: Increased capacity at key ports (Kandla, Mangalore, JNPT) to capture more market share.
- Strategic Partnerships: Joint ventures with global leaders like Vopak and Itochu offer technological expertise and operational synergies.
- Government Initiatives: Support for clean energy (LPG) through programs like PMUY boosts demand.

Risks

- Regulatory Changes: Any shifts in government policies regarding energy distribution could impact the business.
- Volatile LPG Prices: Fluctuations in global LPG prices can affect margins.
- Operational Challenges: Delays in project execution or infrastructure issues can lead to cost overruns.
- Competition: Intensifying competition from other logistics and energy companies could pressure margins.

Downstream segment: refinery crude throughput...

India has 23 refineries - 18 are in the public sector, two in the joint sector and three in the private sector. ▪ India's state refineries have upgraded their facilities to comply with a new government requirement to produce oil products with the equivalent of Euro VI emission standards.

Crude oil throughput of public sector refineries increased at a CAGR of 2.54%, from 108.03 MMT in FY07 to 161.50 MMT in FY23.

At the same time, crude oil throughput of private sector refineries recorded growth at a CAGR of 6.66%, from 33.43 MMT to 93.73 MMT.

Downstream segment: refinery crude throughput... (2/2)

Business Models:

- **Refining:** All three companies (IOCL, BPCL, HPCL) are major refineries of crude oil, converting it into products like petrol, diesel, and LPG.
- **Marketing:** They operate extensive networks of fuel stations and distribute petroleum products to consumers and businesses.
- **Pipeline Transportation:** Each company manages pipelines for transporting crude oil and refined products across regions.
- **Petrochemicals:** They produce and market petrochemical products derived from refined products.
- **Natural Gas:** They are involved in LNG import, storage, distribution, and city gas distribution.

Key Variables to Track:

Crude oil prices, refining margins, sales volumes, pipeline utilization, petrochemical prices.

City Gas Distribution (CGD) Companies (IGL,MGL,Gujarat Gas,IRM Energy)

Vehicle Registrations: Track the number of new vehicle registrations, especially CNG vehicles, as it directly influences demand for natural gas in the transportation sector. This data is critical for assessing growth potential and market dynamics for CGD companies.

Distribution Network:

- **Operations:** Develops and manages infrastructure to distribute natural gas to residential, commercial, and industrial customers within urban and suburban areas.
- **Customer Segments:** Serves households (for cooking and heating), commercial establishments (restaurants, hotels), and industrial users (factories, power plants).

Sales of Natural Gas:

- **Revenue Generation:** Earns revenue through the sale of natural gas to different customer segments based on usage volumes and contract terms.
- **Tariff Structure:** Pricing may be regulated by government authorities or determined based on market conditions.

Infrastructure Investment:

- **Capital Expenditure:** Invests in building and maintaining pipelines, compressor stations, and other infrastructure necessary for gas distribution.
- **Expansion Projects:** Includes expanding service areas and upgrading existing infrastructure.

Regulatory Compliance:

- **Regulations:** Adheres to government regulations regarding safety, pricing, and service standards.
- **Licensing:** Operates under licenses granted by regulatory bodies.

Operations and Maintenance:

- **Daily Operations:** Manages the day-to-day operation of the distribution network.
- **Maintenance:** Regular upkeep of infrastructure to ensure safety and reliability.

Customer Service:

- **Support:** Provides customer support services, including billing, troubleshooting, and handling service requests.

Key Variables to Track:

1. **Natural Gas Prices:** Affects supply costs and customer pricing.
2. **Sales Volumes:** Impacts revenue from gas sales.
3. **Customer Growth:** Influences revenue through new customer acquisition.
4. **Infrastructure Investment:** Affects network capability and service quality.
5. **Regulatory Changes:** Impacts pricing and operational costs.
6. **Operational Efficiency:** Measures cost control and service reliability.
7. **Tariff Structure:** Determines revenue and customer affordability.

Proxy Plays

USAGE IN OIL AND GAS

Usage of Steel Tubes/Pipes in Oil & Gas Industry

- Stainless Steel seamlesswelded pipes – Used to carry in-plant fuel/gas in refineries and other process industries under high pressure/temperature environment
- OCTG – Oil Country Tubular Goods (drilling, casing, tubing) used for oil & gas exploration, well fixing and oil & gas production
- Line Pipe – used for short distance transportation of crude oil, oil products and natural gas
- LDP – large diameter pipe used for construction of trunk pipeline systems for long distance transportation of natural gas, crude oil and petroleum products

PIPES USED IN OIL & GAS

PLAYERS IN OIL AND GAS

Steel pipes and their usage

Type of pipe	Usage	Primary demand driver	Size of pipe	Competitive intensity	Companies
Carbon/Alloy steel seamless (Oil Country Tubular Goods)	Oil & gas drilling, casing, tubing, refineries, power	Oil & gas exploration – 60%-70%	Outer diameter - < 30"	Drastically reduced after anti-dumping duty on Chinese seamless pipes	Maharashtra Seamless, ISMT, Jindal SAW
Stainless steel seamless	Refineries, power, chemicals, process industries, nuclear, defense	Refineries and exploration – 60%-70%	Outer diameter - < 10"	High at the entry level. Reduces with increase in complexity	Ratnamani Metals, Sandvik, Sumitomo
Line pipe -LSAW/HSAW	Long distance oil & gas/water transportation	Oil & gas pipeline -75% Water – 25%	Outer diameter ~70"-100"	Intense for small ticket size orders. Reduces with size of the order	Welspun, MAN Industries
ERW	Short distance oil & gas/water transportation	City gas pipeline -50% Water – 50%	Outer diameter 20"-50"	High	Jindal group, Surya Roshni, Ratnamani Metals, Maharashtra Seamless

SAW PIPES

WHAT ARE SAW PIPES?

SAW pipes are also called line pipes and have two variants:

- **Longitudinal submerged arc welded (L-SAW)**
- **Helical / Spiral submerged arc welded (H-SAW)**

The difference between the two is the way in which they are welded. These are used primarily in refineries, water pipelines, and large diameter water and sewage pipelines. 75% of the demand comes from oil & gas, and 25% from the water segments. L SAW pipes have superior margins than H SAW pipes, EBITDA margins are 20-25% in the L SAW segment.

END USERS OF SAW PIPES

END USAGE OF SAW PIPES

Domestic Clients			International Clients		
 Reliance Industries Limited	 GAIL	 LARSEN & TOUBRO	 NPCC	 PETROBRAS	 ConocoPhillips

EARNINGS PRESENTATION

Venus Pipes Q1FY-25 PPT

Furthermore, our high-margin seamless pipes segment continues its steady growth trajectory with a 22% increase in revenue. The welded pipes segment also experienced a substantial growth of 55%, fueled by strong order inflows from the oil & gas sector, where we see vast potential for further expansion.

Man industries concall

Dhwanil Shah

Sure. And sir just on the previous participant question also. So, when I say historically, sir, we've been kind of doing on a much lower utilization, right? So, now the demand and the whole scenario looks very good and the CapEx cycle is also supposedly pretty long. So, how do you see this in terms of our overall utilization maybe one, two years down the line?

Ramesh Mansukhani

No, that depends, we have the capacity rated. Capable capacity is a different thing. But the range is different, all the equipment. We have the four plant, every plant is producing up to such range, different kind of range. So, we cannot say, we are very underutilization or overutilization. It depends on the product mix, which range, what are these things, lot of formulas are there. But we are reasonably booked, reasonable business is going on. Market, oil and gas sector is doing very well in the worldwide and that's why the projections are much better, more spending by the oil companies in coming future. I can say you, the more capacity utilization will be there, and some bottlenecking also we are renewing at the time. So, I can give you this answer in this manner.

Oil and gas infra player - Likhita Infra

LIL is one of the top Oil and Gas infrastructure providers in India and has vast experience in diversified operations across several geographies. LIL is the first company from India to execute the first-ever Trans-National Hydrocarbon (Multi-product) pipeline project between India and Nepal. LIL is qualified technically and financially (at the highest level) for all the tenders floating in the country in this segment.

- Strong order book providing revenue visibility: The group has an order book of Rs 1,500 crore as of March 31, 2024, which is to be executed over the next 24-36 months. Healthy order book provides revenue visibility over the medium term.

Anup Engineering

OUR PRODUCT PORTFOLIO

Heat Exchangers

- Shell and Tube; Helical Baffle, Critical waste heat

Columns

- Packed Column, Tray Column

Reactors & Vessels

- High Thickness Pressure Vessels (up to 180mm)

Centrifuge (Anup Design)

- For starch and chemical industries.

Others

- Piping spools +

Order Book

- Guidance for FY'25 revenue growth of 25%-30%, targeting INR 700 crores with EBITDA above 20%.
- New order intake for FY'25 expected to be around INR 900 crores, aligning with the execution capacity.
- Emphasis on executing existing orders and calibrating future order intake based on execution capabilities.

Roto Pumps

I am happy to report that the Company achieved many successes during the year 2022-23. Primary amongst this was ongoing diversification initiative in downhole pumps and mud motors, and a solar pumping system under a wholly-owned subsidiary. Some of the other key developments include fortifying our existing marketing establishments in Australia and the United Kingdom through manpower addition; strengthening of our R&D capabilities especially in upcoming technologies; developing a range of progressive cavity pumps and twin-screw pumps for hygienic applications; and development of a suite of non-metallic dosing pumps.

Mud Motors and Downhole pumps; No one makes this in India, Trial order given by ONGC and Reliance
